
Mixing Directions: Simple Green d Pro 5 (From Concentrate)

⚠ **CRITICAL SAFETY REQUIREMENT:** Concentrate mixing must be performed exclusively in an area equipped with an **eye wash station**.

Step 1: Gear Up & Measure

Put on your required Personal Protective Equipment (PPE) before handling the chemical:

- **Neoprene or rubber gloves**
- **Safety goggles**

Using the supplied measuring cup, pump out the appropriate amount of **Simple Green Concentrate** based on your application:

Dilution Amount	Solution Type	Intended Use / Areas
½ oz.	Sanitizer (200ppm)	Food service, general classroom use, tables, and standard surfaces.
2 oz.	Disinfectant (800ppm)	Bathroom areas or surfaces contaminated with bodily fluids.

Step 2: Mix the Solution

1. Fill an empty **1-gallon utility jug** with water.
2. Carefully add the measured Simple Green d Pro 5 concentrate to the water.
3. Replace the lid tightly and **shake gently** to ensure the solution is thoroughly mixed.

Step 3: Label & Store

- **Label:** The utility jug must be properly labeled with its contents and dilution type.
- **Storage:** Store the mixed solution in a **locked area** that is strictly inaccessible to children.
